

CLASSIC UPDATE SERIES

Kit Features:

Classic

Update

- 1** Kit includes the original headlight and parking light, boot, tube, grommets and light sockets as required.

The completely new 18 fuse, 21 circuit, fuse box system that the Classic Update Series is built around comes completely ready to install under the dash. The harness that is mounted under the dash was assembled to accommodate the factory dash supports while not interfering with any aftermarket equipment that you will install under the dash now or in the future.

- 2**

- 3** Original dome lighting is included in the wiring system. Additionally, the Classic Update series includes underdash lighting and enough spare circuits to add power door locks, power windows and much more!

- 4** Original design rear body weatherproof boot and tube assemblies and original design light sockets make attachment to original or reproduction tail light assemblies an easy plug-in. Even custom applications require these assemblies for weather protection!

- 5** All original connectors are provided for connecting to all original equipment: lighting, fuel sender, optional back-up lights, license lights, and even for adding a third brake light.

- 6** Simple 3/7/8" male and female connectors are provided to connect any steering column from the original to fully modified. The wiring harness is completely GM color coded and we even supply the color code to adapt the original system.

- 7** All the Classic Update Series harness systems come ready to connect to the updated SI alternator and original coil/distributor or most any aftermarket system without additional parts.

CAN YOUR KIT? say it's **COMPLETE?**

Headlight
